Governor Cooper,

I have just learned that NC may be approving permits for the Atlantic Coast Pipeline soon. I am emailing to say that I DO NOT want to see this happen. As a North Carolinian, I am concerned about the environmental impact this will have on our coastline and economy. We need to be looking forward (= renewables) rather than backward for our approach to fuel solutions. More fracking and approval of this pipeline benefits Duke Energy's profitability, but at what cost to the rest of us?

Thank you for your consideration,
